Inflatable and foldable kayaks provide paddlers with an ease of transport that few other boats can offer. Inflatables and foldables can be packed into compact cars, carried on pack trips, and carried on airplanes without extra charge. They come in all shapes and sizes and are built for a wide variety of uses.

Inflatable boats are found on many beginner and intermediate stretches of river, allowing paddlers with little or no experience to enjoy the fun and excitement of whitewater. They are durable, maneuverable, and incredibly stable. Specialized inflatables are light enough and pack small enough to be carried on backpacking trips, enabling enthusiasts to alternately hike and float through wilderness areas. Inflatables are often made from Hypalon or Denier nylon with a urethane coating. They come in solo and tandem models, with speed and agility varying greatly by design.

Foldable kayaks generally consist of an aluminum or plastic frame with a synthetic skin stretched over it. They can be used in a wide variety of situations and stand up to tough conditions. They are used by recreational paddlers, expedition kayakers, and the military. Constructed well, they are very seaworthy and because of their transportability they can be carried just about anywhere.

NAUTIRAID | NARAK 550 ALUMINUM

Inspired by Arctic kayaks, the Narak 550 is an adaptation of a Greenland kayak to European sizes. It features a hard chine hull, making it one of Nautiraid's fastest and best ocean-going kayaks. The Narak 550 pays careful attention to ergonomics as well, with a seat with inflatable sides, knee and foot braces to make you feel at one with the boat. You can now order it with the new aluminum frame (fits in one bag instead of two for the wooden frame) and Stabilairs (more stability and inside storage).

BERGANS OF NORWAY | ALLY

The canoe for those who need large carry capacity combined with high stability on flat waters and in rivers. For years the 16.5' DR has been the number 1 choice of expeditions all over the world. The canoe is suitable for 2-3 persons with gear, or 2 adults and 2 children. ALLY 16.5' DR has the same shape as 15' DR but a longer, less rockered keel line, which increases directional stability. This canoe has been paddled in heavy whitewater and on rivers with great technical difficulties with splendid success - making it the optimal choice under all conditions.

NAUTIRAID | HYBRID B.E.A.C.H 325

The single-seater B.E.A.C.H I 325 is the smallest kayak in the Nautiraid range - and in the world - with its mini carry bag no bigger than a suitcase! This unique concept is an alternative to fully inflatable kayaks. The B.E.A.C.H's frame is 5 aluminium tubes, giving it unrivalled rigidity in its category. Its low pressure inflatable sides need no tedious inflating (kite-surfing's 'bladder' technique). This gives you greater internal space.

PROVIDING MAXIMUM EASE OF TRANSPORT FOR ADVENTURE ON THE WATER ANYWHERE YOU WANT TO GO.

NAUTIRAID | GRAND NARAK 550

Designed as an oversized single-seater, Grand Narak stands out with its ability to be just as enjoyable to paddle with two people as by yourself (by putting one of the two seats in the middle). The Stabilairs provide great stability alongside the Narak hull's other features, with its high bow for slicing through the sea, chine hull for straight steering, and its advanced beam for sharp turns and surfing following waves. Narrower than the Grand Raids, this is the fastest of the Nautiraid two-seaters. Your daily range is therefore greater and less tiring. Used as a single-seater, it becomes an expedition kayak with a remarkable load capacity.

PAKBOATS | PAKCANOE

PakCanoes are expedition proved folding canoes with an extremely high standard of quality and security. Not all PakCanoes go on expeditions, but all PakCanoe models are sometimes used that way, so we build them to expedition specifications. Our customers like to know that their canoes are built to take adventures - and occasional misadventures - in stride for years to come. Air sponsons, anodized aluminum, secured cross ribs, comfortable bench seats, five installed keel strips, an easy assembly and many more features make the PakCanoes the best choice. The range has different models for the different requirements people have.

The dropstitch sides create a narrower profile that paddles easier and faster, and also provides more inside space for gear. The open configuration allows full access to all spaces and makes it easier to get back on board after a spill. V-shaped dropstitch inflatable sides create side chines to make this kayak track straighter and go faster with less effort. They also provide secondary stability. The Slider features a unique molded V-shaped form underneath both bow and stern, giving several important benefits

COLLAPSIBLE BOATS RAFT

INFLATABLE RAFTS PROVIDE THE OPPORTUNITY FOR DAYS ON THE RIVER WITH THE WHOLE CREW, WITH ROOM FOR THE DOG TOO!

GUMOTEX | PULSAR 560

PULSAR rafts are used by rafting operators, sports centres, water sports clubs and for races. The quick and rigid hull in combination with the proven way of fixing the bottom to the side tubes provides exceptional stability and an extremely quick draining of the raft in case of flooding in rapids. The Pulsar rafts have already been chosen several times as official racing boss for the European Championships (last time for the European Rafting Championship 2014, Slovakia) and in 2003 even for the World Championship that took place in the Czech Republic on the Vltava river.
